MoAD Learning COVID-19 Safety Plan Overview

Things will be a little different than usual onsite, but we will still have our signature MoAD welcome ready for you.

Below is a brief summary of what the Museum and Learning are doing to keep you and your students safe:

We are committed to ensuring safe physical distancing by Museum Educators, between students and adults, at all times during programs. We are using separate entrances and exits, ensuring visitor traffic only moves in one direction within the museum.

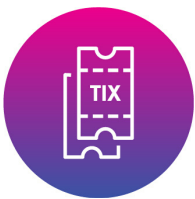

We have increased the amount and the frequency of the cleaning that is undertaken in public spaces. This is focused around areas with high touch points. All resources used during our programs are cleaned after each group.

We have developed a plan to manage visitors and staff who are unwell. Staff have been told to stay home if they are feeling unwell, while general visitors are requested to postpone their visit. If a student or teacher is unwell we request they do not enter the building to participate in a program.

We have made hand sanitiser available to visitors and staff to ensure they are able to maintain good personal hygiene. All students and adults will need to use hand sanitizer upon entering the building.

To ensure the number of people within the museum remains safe and within the ACT Government limits, we have spaced out school bookings to be on the hour. School groups will have exclusive use of the exhibition spaces and the Chamber for their programs.
